This supplement implements and extends guidance of Air Force Manual (AFMAN) 23-110V2PT2CH32, *Contingency Processing: Post-Post, Wartime Processing, and Contingency Planning*. This supplement describes 45 SW procedures for use in conjunction with the basic AFMAN. It applies to all 45 SW activities, tenants and contractors operated or supported by the USAF Standard Base Supply System. This supplement does apply to Air Force Reserve Command and Air National Guard units.

32.1.1. The transition to alternate locations for the Logistics Operational Readiness Control Center (LORCC) and for other supply functions is contained in the LOGOPS Contingency Response Plan.

32.3.3. Routine issue requests will be accepted and processed at the discretion of the Post-Post Control Team (PPCT) Chief after consultation with Supply Manager. Stock replenishment and backorder will be processed using the Contingency Processing System (CPS) procedures in AFMAN 23-110, Volume 2, Part 11. Mission critical requests from the downrange sites, Antigua Air Station and Ascension Auxiliary Airfield, will be routed through Customer Operations. They will keep the downrange sites apprised of the post-post phases and the overall status.

32.4.5. When possible CPS procedures will be used during Phase IV.

32.5.1. The standard of delivery for issues during post-post operations will be 60 minutes more than the time standards reflected in AFMAN 23-110, Volume 2, Part 11, Chapter 1, para 1.5/Table 1.1, for delivery of priorities 01-03.

32.25.2. Additional procedures are contained in the LOGOPS Contingency Response Plan.

32.26.2. The Supply Contingency Management Team (CMT) consists of the Supply Manager, each section supervisor, government QAS and the Supply Functional Director.

32.27.1. The LORCC serves as the key operating function during a contingency. The most qualified member serves as the LORCC Chief and as a member of the CMT. The team serves as an extension of the CMT and oversees actions of the Data Base Recovery Team, Document Reconstitution Team and the Technical Reconstitution Team and the Technical Control Team.

J. GREGORY PAVLOVICH, Brigadier General, USAF
Commander
